

DESIGNING WITH  
TOMORROWS STANDARDS  
...TODAY!

## DRAFTING & DESIGN SERVICES

### ▶ GETTING STARTED

- ▶ If you haven't found the design you're looking for, bring in your ideas and we will bring it to life.
- ▶ If your project has special requirements or limitations, a custom design may be the way to go.

We start with an initial consultation to determine what your 'wish list' is. We then take those ideas and present to you a conceptual design showcasing the features desired and work with you until the design is exactly what you imagined. Once you are satisfied with the design, we will then begin the process of creating a full and final set of construction drawings.

## WEST-ECO USES ONLY THE LATEST DESIGN SOFTWARE

### AUTODESK REVIT

Revit is a powerful Building Information Modeling (BIM) software that can be used from concept to construction. The 3D rendering and walkthrough capabilities allow you to visualize every detail of your project before construction.

### AUTODESK AUTOCAD

AutoCAD is a 2D design software used by many professionals. At WEST-ECO, we create our Structural Insulated Panel shop drawings in AutoCAD to allow us greater control over the panel design.

## WEST-ECO DRAFTING & DESIGN

- ▶ **WEST-ECO** will take your project from concept through to final construction plans. We work with you every step of the way to ensure your house or project is designed exactly the way you like.
- ▶ **WEST-ECO** Designers are well trained in conventional frame and energy efficient SIP Construction along with a variety of alternative forms of energy efficient building envelopes. Our knowledge of the National Building Code and new Energy Efficiency Codes and Guidelines, allows us to create an energy efficient custom design to your desired specifications and code requirements.
